

How do you know what your patients are really taking?

RX2Live[®]
Prescription for Life

CareViewRx

Four out of five patients fail to mention important OTCs, skip doses, take family member's medications, or use illicit drugs. These factors can lead to misdiagnosis, dangerous adverse drug events, and contribute to 100,000 deaths annually. Relying on a report from the pharmacy is only half of the battle. CareViewRx mitigates these issues with our next generation precision urine testing.

CareViewRx provides comprehensive and affordable further emphasis testing so you can **KNOW THE WHOLE TRUTH**. Our next generation precision testing services are:

COMPREHENSIVE 300+
prescription and
over-the-counter
medications/metabolites

FAST 24-48
hour turn
around time for
most results

ACCURATE 1/1.5M
error rate
or 1/10,000
patients results

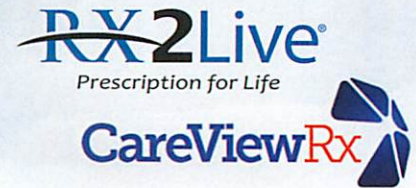

AFFORDABLE \$75
out of pocket
cost if not covered
by insurance*

*CareViewRx is covered by Medicare, Medicaid, and many insurance companies using a specialty CPT code from the AMA for patients with two or more chronic conditions or prescriptions.

**RESULTS INCLUDE A FULL REPORT THAT
AUTOMATICALLY FLAGS INCONSISTENCIES**

Provide better care while reducing your liability

Adding CareViewRx testing to your program is a win-win!

BETTER OUTCOMES:

There are many reasons patients fail to accurately report what they are taking during an exam. Providing objective substance results allows for honest conversation that can improve patient compliance and overall health.

A SIMPLE PROCESS

1. COLLECT

Specimen is collected in the physician's office or patient's home

2. SHIP

Specimen is shipped to lab

3. REVIEW

Results received within 48 hours
